

## Study Obligations of PhD students

The content of the doctoral study is specified for each student in the individual study plan. Each student is obliged to create it together with the Supervisor within two months after the enrolment to study. The individual study plan is recorded by the student in the Students Information System.

The student's fulfillment of the individual study plan is assessed annually and the assessment is submitted to the Subject-Area Board for approval.

The specification of the study obligations for each study programme can be found in the file attached below.

For more information please see the [Rector's Directive No. 19/2018 Doctoral Study Handbook](#).
